PROFESSIONAL PROFILE

Systems Engineer and IT Auditor at KPMG with a highly technical hybrid profile. Combines solid experience in backend software engineering and secure microservices architecture (gained in the banking sector, Bancolombia) with technology risk assessment, cybersecurity, and IT auditing capabilities under internal control standards (SOX/ICFR) and regulatory frameworks (PCAOB). Certified ISO 27001:2022 Lead Auditor, with specialized training aligned with CISA and Cisco CyberOps. Experienced in auditing operating systems (Linux/Windows), databases (SQL, Oracle), and infrastructure. Passionate about automating audit and QA procedures through data analytics and custom scripts.

PROFESSIONAL EXPERIENCE

KPMG Colombia - IT Auditor

March 2024 - Present

- Audited and evaluated IT General Controls (GITCs) including Change Management, Logical Access, IT Operations, and Systems Acquisition/Development under SOX and ICFR frameworks.
- Inspected security compliance and control effectiveness across enterprise technology layers: Operating Systems (Windows, Linux), Databases (SQL Server, Oracle), and ERP systems (SAP).
- Assessed third-party risk controls by analyzing and reviewing SOC 1 and SOC 2 assurance reports and verifying User Entity Controls (UECs).
- Automated audit testing procedures, performed complex data analysis, and generated audit evidences using advanced Excel macros with Visual Basic for Applications (VBA) programming, DataSnipper, and IDEA Scripting.
- Applied KPMG's global audit methodology daily using the digital system KPMG Clara Workflow.

Bancolombia - Backend Software Engineer

November 2022 - March 2024

- Designed and developed the full software lifecycle of banking microservices in secure, high-availability, transactional environments.
- Applied secure development practices based on the OWASP Top 10 framework to mitigate critical vulnerabilities and protect financial data.
- Implemented unit and integration tests to ensure code quality, software resilience, and performance tuning.
- Maintained and updated production backend applications, utilizing Git-based version control and automated CI/CD pipelines.

Unisys - UTS Technical Support Representative 2

March 2022 - November 2022

- Provided advanced Level 2 hardware and software technical support, resolving critical incidents for enterprise multinational clients.
- Managed the complete incident lifecycle using corporate ticketing systems in alignment with ITIL best practices and strict SLAs.
- Supported virtualization platforms, network telecommunication architectures, and corporate network configurations.

DAWA Solutions Group - IT Support & Maintenance Assistant

August 2021 - February 2022

- Administered and maintained local relational databases (SQL Server, MySQL, Access) and managed local area network (LAN) operations.
 - Supported corporate Virtual Desktop Infrastructure (VDI), secure VPN connections, and basic Robotic Process Automation (RPA) tools.
 - Executed server hardware preventive maintenance and basic administrative tasks within the corporate SAP ERP system.
-

EDUCATION

B.S. in Systems Engineering

Fundación Universitaria del Área Andina | Graduated Feb 2025

Diploma in Cybersecurity Operations

Fundación Universitaria del Área Andina | Completed 2024

SKILLS & TECHNOLOGIES

Audit & Risk: SOX, PCAOB, ICFR, COBIT, ITIL, SOC 1 & 2.

Security: Cybersecurity, ISO 27001, Cisco CyberOps, OWASP.

Development: Python, SQL, Linux, Git, Microservices, REST APIs.

Automation: DataSnipper, Excel VBA Macros, IDEA Scripting, SAP ERP.

FEATURED CERTIFICATIONS

- ISO 27001:2022 Lead Auditor (Udemy/Rigcert, 2025)
- Cisco Certified CyberOps Associate (Cisco, 2024)
- Masterclass - CISA Exam Prep 2025 (Udemy, 2025)
- IT Audit: General & Application Controls (Udemy, 2025)
- IT Audit: Cloud Fundamentals (AWS/Azure) (Udemy, 2025)
- IT Audit & Internal Controls Modules (KPMG, 2023-2024)
- Ethics & PTEE Compliance (SAGRILIFT) (KPMG, 2023)
- NDG Linux Unhatched Certificate (Cisco Academy)
